

Re: Linoleum Desk Tops

The linoleum top on this desk is of exceptionally high quality and with a small amount of care the top can be kept in fine condition.

It is recommended that the top occasionally be cleaned with warm water and soap. Then wiped clean so that no soap residue remains. Following this it is our recommendation that Armstrong's Linoleum Cleaner be used. It can be purchased in some of your local stores thereby avoiding the higher cost which is incurred in handling and postage if ordered from us. Apply Armstrong cleaner (not too freely) and rub dry with a soft dry cloth using a circular motion.
