

The modification is as follows:

- A. Replace the 25k, 4 Watt Drive Potentiometer resistor with a 25k, 5 Watt unit,
- B. Add a 10k to 15k, 10 Watt resistor in series with the LV B+ and the Drive Potentiometer,
- C. Add a 22 uF, 450V electrolytic at the junction of the Drive Potentiometer and the New 10 to 15k 10 Watt resistor.

Generic Buffer-Driver Stage Drive Potentiometer Modification
