

# January 2, 2019 edit

## 1 **Electronics Vintage Parts List**

2 **v.20190102-SURVEY\_working from 2014-05-01 revised 201 -0 -11**

3 NOTE: Item numbers good only for this version of Catalog. May change when new sheet published!

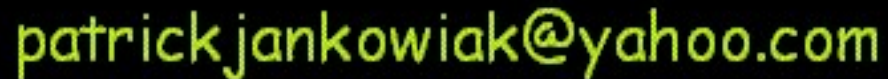

4 **Unless otherwise stated items are used and may be a few decades old**

5 **Items are tested for shorts between windings and to case**

6 **Items being vintage may have cosmetic or physical appearance issues. These have not been made in a long time. We can only guarantee what is stated.**

7 **Buyers are welcome to ask for pictures or other services before purchase. No shipping will be paid or be refunded on returns for any reason.**

8 **Contact: bunker of doom dot com or adress below:**

A black rectangular box containing the email address "patrickjankowiak@yahoo.com" in a yellow, monospaced font.

9 **Section 0: this cover**

10 **Section 1: Special Items Magnetics stored in in lab/shelves**

11 **Section 2: Inductors stored in in lab/shelves**

12 **Section 3: Transformers stored in in lab/shelves**

13 **Section 4: Transformers and Parts stored in 11 building**

14 **Section 5: CRT list**

# Inductors

v.20190102-SURVEY\_working\_from 2014-05-01 revised 2017-06-11

NOTE: Item numbers good only for this version of Catalog. May change when new sheet published!

Unless otherwise stated it should be assumed the chokes are for the customary medium voltage range of 200-500VDC as found in receivers and audio equipment.

power cord	Shop/Industrial on ceiling-mount automatic reel 25-50 FT
power supply	BUD rack with power supply black 0-110vac .3vac 0-50V bias 105V reg
rack	1 5V reg 0-350VDC built for USAF FREED iron
rack	24"H plus slanted top section for control panels
speaker	About 30" tall with unknown comple old military pro ect/test e uipment.
Time relays	University immersion proof MM-2F 1 Ohm 25W
transformer	a bo of time delay relays plug-in 0.5 to 0 seconds "Freeman Timer"
transformer	RCA 00 3 filament CRV-30545 100/115V 50/ 0H 3 2.5VAC 5A 2500WVDC
transformer	GE multi filament 500W core military tube checker voltages from 1 to 115V
transformer	H/P Paeco 100-0035 400
transformer	tekreoni scope type
transformer	hypersil about 1KVA several windings
transformer	H/P Paeco 10-15

## CRT POLICY:

**This is the full list of available CRTs.** Please inquire by item number to avoid delays.

**Please do not ask for CRTs that are not on this list. We don't have them and do not know where to get them. Try other honest vendors like <http://sphere.bc.ca/>**

**We will not ship outside of the United States.** It is not economical for us due to the many forms and parts classifications now required by the government.

**Quality Checks:** CRTs are visually inspected by a technician for obvious defects and then properly packaged for shipment. Where possible we will re-use the original carton and place that inside a larger carton with re-usable padding. This recycling saves waste from the landfill. Unless a tube is NOS, we can only guarantee to check filament and appearance. In some cases we might be able to check emission but there is no guarantee that it means the tube is good. CRT's require so many different voltages that it is not economical to try to test them all, and TV-type CRT Testers don't generally test scope CRTs. It requires a special jig. In no case will we send out a CRT that seems/looks questionable unless it is first agreed to by the buyer. It might be dusty, it might be used, and a used tube might have a mark or two on it, but we do not sell 2nd degree burn victims, rattlers, gassy getters, etc. because we know you won't be happy with them. A used CRT might have a slight burn but we will tell you beforehand about anything we see when we inspect it. This is visually checked by looking at the whole CRT including the face when it's verified to be in stock upon inquiry. Customers are welcome to ask for a picture and ask questions about a CRT.

**GUARANTEE:** If you are dissatisfied with a CRT after trying it out, you may obtain a R.A. # and ship it back within 10 calendar days at your expense in the original packing for a refund of the purchase price of the tube. Once it has been received in the same condition and same packing as it was shipped in, we will cheerfully refund the price of the CRT. Please understand that at these low prices starting at \$20 per CRT, we can not refund any shipping costs.

**Hackers' Notes:** Aside from the "regular" CRT types like a 3BP1 or 5CP1, many oscilloscope-specific types are listed, and for very good prices. Did you know that these are also easily used in home-made projects just like the others? Professional oscilloscope CRTs (H/P, TEK..) are of very high quality and are capable of great brightness. They sometimes need more voltage on the anode because of the burn-resistant aluminized faceplate, but the performance is well worth it! The easy way to find the ratings and base pinouts is to look up the associated scope manual (bama.edebis.com, or bama.com, etc..) and download the scope manual free. From this, the operating voltages are easily found. Don't overlook these special values!

location may not be accurate.
